SUMMARY

Aspiring Data Scientist with hands-on experience in Python-based data analysis, visualization, and machine learning fundamentals. Strong computer science background with the ability to build data-driven applications and extract actionable insights from real-world data.

EXPERIENCE

Cybex IT Group Faisalabad

Faisalabad, Pakistan

Data Analyst Internee

Sep,2025 to Dec,2025

- Trained and evaluated machine learning models using regression techniques for data-driven insights. Performed extensive data cleaning, preprocessing, and visualization to support analytical decision-making. Developed interactive Power BI dashboards for performance tracking and business intelligence. Integrated ML models into web applications using RESTful APIs and FastAPI for seamless deployment.

Gravixta Faisalabad

Faisalabad, Pakistan

Data Analyst Internee

June,2025 to Sept,2025

- Tra Cleaned and processed raw data, removing errors and inconsistencies.
- Performed data preprocessing to prepare datasets for analysis.
- Created visualizations to summarize insights and trends effectively.

EDUCATION

Govt College University Faisalabad

Faisalabad, Pakistan

B.S in Computer Science

2021 to 2025

- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Programming, Database, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Statistics.

PROJECTS

Telecom Customer Churn Prediction System

- Developed a machine learning system to predict customer churn using a telecom dataset (7,043 records, 21 features). Performed data cleaning, feature analysis, and trained a CatBoost model achieving ~80% accuracy. Created interactive dashboards in Power BI to visualize churn patterns and support data-driven retention strategies. [Click here](#)

Smart City Traffic Analysis

- Conducted traffic congestion analysis using synthetic smart city data (1,000 records). Performed data cleaning, feature engineering, and trained a Random Forest model to predict congestion. Visualized traffic patterns, feature importance, and relationships using Python libraries, and created an interactive Power BI dashboard showing hourly trends, congestion heatmaps, and weather/accident impacts. Certification & Achievements

- **Power of Jupyter Notebook** - Microsoft Student Ambassador
- **SQL Database Intermediate** - HackerRank
- **Python Programming Fundamentals** - HackerRank
- **Problem Solving Certificate** - HackerRank
- **React Basics** – HackerRank
- **REST API** – HackerRank

SKILLS

Languages: Python, SQL, C++, JavaScript.

Data Analysis & Visualization: Numpy, Pandas, Seaborn, Matplotlib.

Tools & Platforms: Power BI, Jupyter Notebook, Kaggle, Git, Excel, VS Code

APIs & Testing: Postman.
