SUMMARY

Full Stack-oriented Computer Science graduate with hands-on experience in **Python, SQL, and data-driven application development**. Skilled in building web apps with **React & JavaScript**, working with databases, and turning data into insights through **analytics and visualization tools**. Able to bridge software development and data workflows, including dashboards, automation, and data-backed solutions.

EXPERIENCE

Cybex IT Group.ltd

Faisalabad, Pakistan

Data Analyst Internee

Sep,2025 to Dec,2025

- Trained and evaluated machine learning models using regression techniques for data-driven insights.
- Performed extensive data cleaning, preprocessing, and visualization to support analytical decision-making.
- Developed interactive Power BI dashboards for performance tracking and business intelligence.
- Integrated ML models into web applications using RESTful APIs and FastAPI for seamless deployment.

Gravixta Faisalabad

Faisalabad, Pakistan

Data Analyst Internee

June,2025 to Sept,2025

- Tra Cleaned and processed raw data, removing errors and inconsistencies.
- Performed data preprocessing to prepare datasets for analysis.

Excelerate

Remote

Data Analyst Internee

March ,2025 to April,2025

- Cleaned and processed raw data using Excel and SQL, removing errors and preparing datasets for analysis.
- Wrote SQL queries and created Excel visualizations to extract insights and present data trends effectively.

EDUCATION

Govt College University Faisalabad

Faisalabad, Pakistan

B.S in Computer Science

2021 to 2025

- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Programming, Database, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Statistics.

PROJECTS

Telecom Customer Churn Prediction System

- Developed a machine learning system to predict customer churn using a telecom dataset (7,043 records, 21 features). Performed data cleaning, feature analysis, and trained a CatBoost model achieving ~80% accuracy. Created interactive dashboards in Power BI to visualize churn patterns and support data-driven retention strategies. [Click here](#)

Mobile Phone Recommendation System (MERN)

- Built a mobile-friendly phone comparison platform with AI-driven recommendations.
- Integrated Flask-based recommendation engine via /predict endpoint.
- Includes features like authentication, favorites, admin panel, and chatbot integration. [\(GitHub Link\)](#)

Certification & Achievements

- **Power of Jupyter Notebook** - Microsoft Student Ambassador
- **SQL Database Intermediate** - HackerRank
- **Python Programming Fundamentals** - HackerRank
- **Problem Solving Certificate** - HackerRank
- **REST API** – HackerRank

SKILLS

Languages: Python, SQL, C++, JavaScript.

Data Analysis & Visualization: Numpy, Pandas, Seaborn, Matplotlib.

Tools & Platforms: Power BI, Jupyter Notebook, Kaggle, Git, Excel, VS Code

APIs & Testing: Postman.
